Introduction

1.1 Research Background & Objectives

To conduct a survey amongst residents in the High Peak area to assess shopping habits for main food and grocery, top-up food, non-food shopping and leisure activities.

1.2 Research Methodology

A total of 701 interviews were conducted between Monday 15th November and Wednesday 1st December 2021. Interviews were conducted using NEMS in-house CATI (Computer Assisted Telephone Interviewing) Unit. Respondents were contacted during the day and in the evening. All respondents were the main shopper in the household, determined using a preliminary filter question.

1.3 Sampling

1.3.1 Survey Area

The survey area was segmented into 6 zones defined by postcode sector. The zone details were:

Zone	Postcode Sectors	Number of Interviews
1	SK13 0, SK13 1, SK13 2, SK13 5, SK13 6, SK13 7, SK13 8, SK14 6, SK14 8	140
2	SK6 5, SK12 2, SK22 1, SK22 2, SK22 3, SK22 4, SK23 0, SK23 6, SK23 7, SK23 9	141
3	S32 1, S32 2, S32 3, S32 4, S32 5, S33 0, S33 6, S33 7, S33 8, S33 9	100
4	DE45 1	100
5	SK17 6, SK17 7, SK17 8, SK17 9	120
6	SK11 0, SK17 0, ST13 5, ST13 6, ST13 8	100
Total		701

1.3.2 Telephone Numbers

The landline numbers are generated through a process known as Random Digit Dialling (RDD), whereby we start with known 'seed' numbers and then generate all possible number combinations around these. Known business numbers are removed and the remaining numbers are randomly sorted to give each number the same and equal chance of being selected.

The benefit of using RDD numbers (as opposed to those generated from pre-existing lists such as telephone directories and Electoral Register entries) is that ex-directory numbers are also included in the survey sample. In practice, this means that the sample provided is in no way preselected, and that consumers who had opted-out of providing their telephone contact details to directory operators had the opportunity to take part in the research, thereby removing potential bias in the sample.

Mobile numbers were also included in the survey sample to further increase the inclusivity of the survey, given the increase in the number of mobile-only households amongst certain demographic groups (especially younger people and lower income households). These numbers are generated from a variety of commercial sources, where permission has been given to use such contact information for research and marketing purposes.

We don't screen against the TPS (Telephone Preference Service) database, again because the demographic profile of TPS registered numbers is slightly different to the rest of the population. In addition, there is no legal requirement to screen against TPS registered numbers; market research is not classified as unsolicited sales and marketing.

1.3.3 Time of Interviewing

Approximately two-thirds of all calls are made outside normal working hours.

1.3.4 Sample Profile

It should be noted that as per the survey's requirements, the profile of respondents is that of the main shopper / person responsible for most of the food shopping in the household. As such it will always differ from the demographic profile of all adults within the survey area. With any survey among the main shopper / person responsible for most of the food shopping in the household the profile is typically biased more towards females and older people. The age of the main shopper / person responsible for most of the food shopping in the household is becoming older due to the financial constraints on young people setting up home.

A number of measures are put in place to ensure the sample is representative of the profile of the person responsible for most of the food / shopping in the household.

First of all, interviewing is normally spread over a relatively long period of time, certainly longer than the theoretical minimum time it would take. This allows us time to call back people who weren't in when we made the first phone call. If we only interview people who are at home the first time we call, we over-represent people who stay at home the most; these people tend to be older / less economically active.

We also control the age profile of respondents; this is a two-stage process. First of all, we look at the age profile of the survey area according to the latest Census figures. Using a by-product from additional data we collect from a weekly telephone survey of a representative sample of all adults across the country we know the age profile of the main shopper in any given area. This information is from data based on in excess of 100,000 interviews and is regularly updated and is therefore probably the most accurate and up to date information of its kind.

Stratified random sampling helps ensure that the sample is as representative as possible. While the system dials the next randomly selected number for interviewers, all calls are made by interviewers; no automated call handling systems are used.

1.3.5 Monitoring of Calls

At least 5% of telephone interviews are randomly and remotely monitored by Team Leaders to ensure the interviewing is conducted to the requisite standard. Both the dialogue and on-screen entries are monitored and evaluated. Interviewers are offered re-training should these standards not be met.

1.4 Weightings

To correct the small differences between the sample profile and population profile, the data was weighted. The population is of the main shopper in the household. Weightings have been applied to age bands based on an estimated age profile of main shoppers (see section 1.3.3 for details). The weighted totals differ occasionally from the adjusted population due to rounding error. Details of the age weightings are given in the table below:

Age	Main Shopper Profile (%)	Interviews Achieved	Age Weightings
18-34	17.5%	64	1.9124
35-44	16.3%	75	1.5237
45-54	19.8%	125	1.1077
55-64	20.2%	133	1.0634
65+	26.3%	304	0.6066
Total		701	

Further weightings were then applied to the zone data, to adjust zone samples to be representative by population. Details of those weightings are given in the table below:

Zone	Population *	Interviews Achieved	Interviews Achieved (Weighted by Age)	Zone Weightings
1	40,357	140	180	1.0425
2	39,959	141	178	1.2884
3	10,658	100	48	0.5530
4	8,676	100	39	0.5157
5	29,272	120	130	0.9457
6	28,343	100	126	1.3832
Total	157,265	701	701	

* Source: 2011 Census

1.5 Statistical Accuracy

As with any data collection where a sample is being drawn to represent a population, there is potentially a difference between the response from the sample and the true situation in the population as a whole. Many steps have been taken to help minimise this difference (e.g. random sample selection, questionnaire construction etc) but there is always potentially a difference between the sample and population – this is known as the standard error.

The standard error can be estimated using statistical calculations based on the sample size, the population size and the level of response measured (as you would expect you can potentially get a larger error in a 50% response than say a 10% response simply because of the magnitude of the numbers).

To help understand the significance of this error, it is normally expressed as a confidence interval for the results. Clearly to have 100% accuracy of the results would require you to sample the entire population. The usual confidence interval used is 95% - this means that you can be confident that in 19 out of 20 instances the actual population behaviour will be within the confidence interval range.

For example, if 50% of a sample of 701 answers “Yes” to a question, we can be 95% sure that between 46.3% and 53.7% of the population holds the same opinion (i.e. +/- 3.7%). The following is a guide showing confidence intervals attached to various sample sizes from the study:

%ge Response	95% confidence interval
10%	±2.2%
20%	±3.0%
30%	±3.4%
40%	±3.6%
50%	±3.7%

1.6 Data Tables

Tables are presented in question order with the question number analysed shown at the top of the table. Those questions where the respondent is prompted with a list of possible answers are indicated in the question text with a suffix of [PR].

The sample size for each question and corresponding column criteria is shown at the base of each table. A description of the criteria determining to whom the question applies is shown in italics directly below the question text; if there is no such text evident then the question base is the full study sample. If the tabulated data is weighted (indicated in the header of the tabulations), in addition to the sample base, the weighted base is also shown at the bottom of each table.

Unless indicated otherwise in the footer of the tabulations, all percentages are calculated down the column. Arithmetic rounding to whole numbers may mean that columns of percentages do not sum to exactly 100%. Zero per cent denotes a percentage of less than 0.05%.

Percentages are calculated on the number of respondents and not the number of responses. This means that where more than one answer can be given to a question the sum of percentages may exceed 100%. All such multi-response questions are indicated in the tabulated by a suffix of [MR] on the question text.

Where appropriate to the question, means are shown at the bottom of response tables. These are calculated in one of two ways: if the data is captured to a coded response a weighted mean is calculated and the code weightings are shown as a prefix above the question text; if actual specific values were captured from respondents these individual numbers are used to calculate the mean.

Weighted:

November 2021

	Total	Zone 1		Zone 2		Zone 3		Zone 4		Zone 5		Zone 6		
Q13 Do you make 'top up' shopping trips in between your main food shopping trips? Top up grocery shopping includes 'basket shops' in foodstores, purchases from speciality retailers such as bakers, butchers and greengrocers, and snacks bought from shops. It could also include online food shopping.														
Yes	73.9%	518	74.9%	135	74.2%	132	79.4%	38	75.5%	29	73.6%	96	69.6%	88

Q16 Thinking more generally how much does your household spend on average on 'top up' food and grocery shopping in a week? Once again, top up grocery shopping includes 'basket shops' in foodstores, purchases from speciality retailers such as bakers, butchers and greengrocers, and snacks bought from shops.														
<i>Those that do top-up shopping at Q13</i>

Sample Questionnaire

Job No: 111121
High Peak Retail Study

Good morning / afternoon / evening, I am from NEMS Market Research, an independent market research company, and we are conducting a short survey on behalf of High Peak Council, which is intended to ensure future shopping and leisure needs can be met in the local area. Do you have time to answer some questions please? It will take about 6-7 minutes.

QA Are you the person responsible, or jointly responsible, for the main food shopping in your household?

Yes
No

IF 'YES' – CONTINUE INTERVIEW.
NOT AVAILABLE THANK AND CLOSE INTERVIEW.

INTERVIEWER INFO: Note there is no such place as High Peak. High Peak is a borough - so please probe where they mean in High Peak whenever High Peak is stated as an answer.

READ OUT: "We now have a few questions about where you go food shopping. In answering these questions the location may be a store in a centre, on a specific road or area, or the internet."

Q01 Where did you last undertake your main food and grocery shopping?
LIST - PLEASE USE THE OTHER BOX.

#Conv	Convenience List	GO TO Q03
	Internet / delivery	GO TO Q02
	(Don't know / can't remember)	CLOSE
	(Don't do this type of shopping)	CLOSE

Those who said 'Internet / delivery' at Q01

Q02 Which retailer did you purchase your main food internet / home delivery shopping from?
DO NOT READ OUT. ONE ANSWER ONLY.

1 Amazon Pantry
2 Asda
3 Iceland
4 Marks & Spencer
5 Morrisons
6 Ocado
7 Sainsbury's
8 Tesco
9 Waitrose
A Other (PLEASE WRITE IN)
B (Don't know / can't remember)

Q03 What is the main reason you chose (STORE MENTIONED AT Q01) for your main food and grocery shopping?
DO NOT READ OUT. ONE ANSWER ONLY

001 Accessibility by public transport
002 Car parking prices
003 Car parking provision
004 Choice of food goods available
005 Choice of shops nearby selling non-food goods
006 Choice of shops selling food goods
007 Cleanliness
008 Cycle parking availability
009 Delivery service
010 Easy to get to by car
011 Entertainment / events
012 Facilities within the store eg Café, Beauty Salon, Dry Cleaners etc.
013 Good Covid distancing/safety measures
014 Good internal layout
015 Good service / friendly staff
016 Habit / always use it / preference for retailer
017 Internet shopping is convenient
018 Lower prices
019 Loyalty card / points scheme
020 Near to home
021 Near to work
022 Nice shopping environment
023 Only one in the area / no other choice
024 Provision of leisure facilities nearby
025 Provision of services nearby, such as banks and other financial services
026 Public information, signposts and public facilities
027 Quality of food goods available
028 Quality of shops selling food goods
029 Safety (during the day)
030 Safety (during the evening / night time)
031 Speciality foods
032 Staff discount / work there
033 Value for money
500 Other (PLEASE WRITE IN)
505 (Don't know / varies)
509 (No reason in particular)

Q04 What, if anything, is the one thing you most dislike about (STORE MENTIONED AT Q01)?
DO NOT READ OUT. ONE ANSWER ONLY

- 001 Change layout too often
- 002 Difficult to get to by car
- 003 Difficult to get to by public transport
- 004 Doesn't have a cafe
- 005 Doesn't have a petrol station
- 006 Expensive prices
- 007 Lack of Covid distancing/safety measures
- 008 Lack of cycle parking
- 009 Lack of stock / poorly stocked shelves
- 010 Lacks character / atmosphere
