

# Fairfield Common A6 roundabout

March 23 Update

## A Warm Thank You

The site team at Galliford Try would like to take this opportunity to thank everyone in the local community for their support and patience during the delivery of the new roundabout and associated infrastructure.

We would also like to thank all members of the public who took time out of their day to come and speak with us throughout the project and provide such positive feedback. And, last but not least, we would like to give a big thank you to all the operatives involved with this project. Without their efforts and skill we would never be able to deliver on our goals.

Over the coming months the new pedestrian and equestrian crossing will be completed, after the power connection is made by Electricity North West. This work will not require any traffic management so there will be no impact on residents.

The delivery of projects such as this is much more than just the kerbs and tarmac that people see as the finished product. A project is about the local community, training, the environment, team spirit and quality.

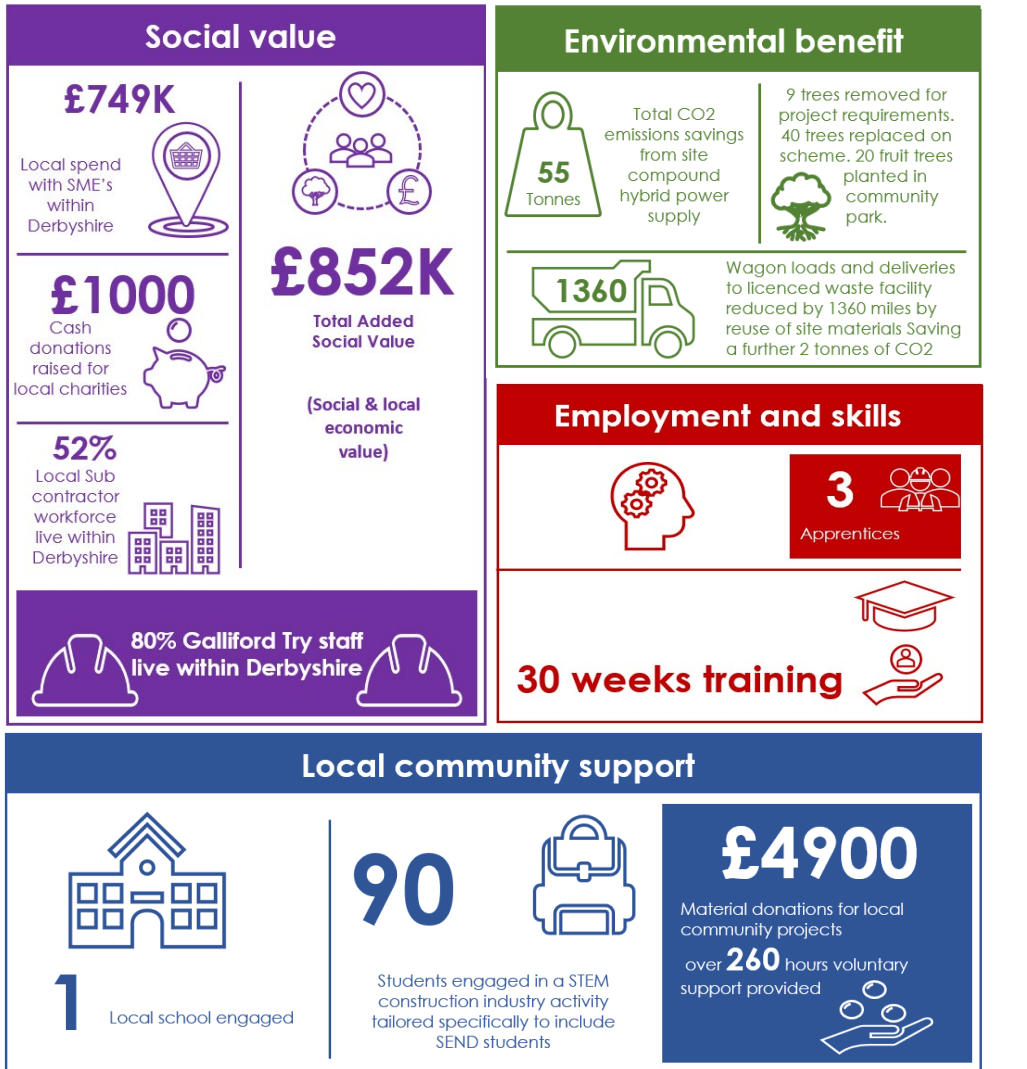

Throughout this project we have tried to leave a lasting legacy in the area as demonstrated in the community projects we have engaged with.

This scheme has delivered big environmental improvements in such a small area. 40 trees were planted on the completion of this work. The scheme also created biodiversity enhancements by creating invertebrate habitats within the embankments (stone strips) and also a hibernacula (buried rubble and wood). These areas provide both natural shelter and a source of food for a variety of wildlife in the area.

During the spring months our team will be back on site to sow a mixture of grass and wildflower seed to the open public areas.

## Social and community engagement

### Residents of Fairfield Association

The site team, alongside our supply chain partner PTL, helped the Association with their aim of providing an orchard for the local children to enjoy and learn from. Alongside this assistance, we also provided a donation of £500 for the Association to use towards further projects in the area. We are looking forward to seeing the opening of the new ROFA space and enjoy a cup of tea and chat with residents at the opening event.

### Buxton Junior School Visit

The project team delivered a hugely enjoyable tetrahedron (a triangular based pyramid) activity to the pupils of Buxton Junior School. This activity encourages young children into Science Technology Engineering and Mathematic (STEM) subjects and teaches them more about the opportunities available to them through STEM.

### Cunningdale Allotments

This project assisted with the expansion of the Cunningdale allotments by clearing two areas of overgrowth and rubble. One area has been left for future use for new plots and the other area has been transformed into a new parking and unloading area.

### Fairfield Bowling club

A group of 6 volunteers from site gave their time to assist the local Fairfield bowls club with the movement of material following the dismantling of their old club house. Together we moved enough material to fill two skips!
